

RADIOPHARMACIES

tomography (SPECT) prescriptions to local hospitals and outpatient imaging centers. Three of these radiopharmacies have on-site cyclotrons, used in the production of radiopharmaceuticals for positron emission tomography (PET). Together, these locations serve nearly **4 million patients** each year, making JDR the **second-largest nuclear pharmacy network in the United States**.

With more than 30 years of experience in preparing radiopharmaceuticals, the highly trained team of skilled nuclear pharmacists deliver the specialized expertise and customized solutions critical to supporting and enhancing the nuclear medicine industry.

JDR offers a wide spectrum of nuclear medicine products that provide safe and cost-effective ways to image the body and treat disease. The pharmacies are open formulary, providing customers with a full array of radiopharmaceutical product options. This allows clinicians to select the products they prefer to achieve the highest benefit for their patients.

JDR procures and supplies only US Food and Drug Administration (FDA)-approved radiopharmaceutical products from cGMP compliant manufacturers and fully support USP compounding standards during compounding and dispensing. Additionally, in accordance with the State Boards of Pharmacy regulations, prescription orders are required for all radiopharmaceutical products dispensed.

JDR is customer focused. Our pharmacies are reliable partners, offering creative, customized solutions to physicians to help them better serve their patients. They also provide education, to ensure their customers are kept abreast of new clinical advancements in the field. Jubilant DraxImage Radiopharmacies' Institute of Learning is dedicated to advancing the field of Nuclear Medicine through education, research, publishing and identification of innovative best practices. Through the Institute, the team creates a community of subject matter experts available to consult on clinical, technical, and regulatory matters related to nuclear medicine

JDR continues to invest in its radiopharmacies to ensure that they are maintaining the highest level of compliance to all regulatory bodies that oversee their operations.

Radiopharmacies

Jubilant Pharma Ltd, through its wholly-owned subsidiary, Jubilant Radiopharmaceuticals, with the sub-business unit of Jubilant DraxImage Radiopharmacies (JDR), is focused on delivering patient specific doses of radiopharmaceuticals to local Nuclear Medicine Departments across the United States. Nuclear Medicine is a medical specialty that uses very small amounts of radioactive material (radiopharmaceuticals) to diagnose and treat disease.

Headquartered in Orlando, Florida, JDR operates a nationwide network of over **50 nuclear radiopharmacies**, employing over **700 highly skilled professionals**. These specialized radiopharmacies provide single photon emission computed
