

JUBILANT
LIFESCIENCES

**NUTRITIONAL
PRODUCTS
(VITAMIN B3)**

Jubilant is currently the 2nd largest manufacturer of Niacinamide & Niacin (Vitamin B3) worldwide. The company enjoys a strong position of trust and reliability with its customers across the globe on account of its quality of products and services.

Vitamin B3 - Niacinamide & Niacin

Jubilant's complete backward integration to the basic feedstock enables unmatched advantages of consistent quality & availability for Niacinamide & Niacin, leveraging its global scale of Pyridine and Beta Picoline manufacturing operations.

Our production facilities comply with world class standards required for food ingredients manufacturing under FSSC -22000, HACCP, c-GMP, Kosher, Halal, ISO, OHSAS and FAMI-QS regulations.

Product Variants

Product Name:

Niacinamide

Synonyms:

Nicotinamide, Nicotinic Acid Amide

Chemical Name:

3 - Pyridine-Carboxylamide

Chemical Formula:**CAS Number:**

98-92-0

Pharmacopeia Compliance:

USP / EP / BP/ JP / FCC

Grades:

Powder, Fine Granular and Granular

Product Name:

Niacin

Synonyms:

Nicotinic Acid, VitaminPP

Chemical Name:

3 - Pyridine-Carboxylic Acid

Chemical Formula:**CAS Number:**

59-67-6

Pharmacopeia Compliance:

USP / EP / BP/ JP / FCC

Grades:

Powder and Granular

Application Areas

Vitamin B3 is necessary to maintain energy and general vitality as it helps to release the energy and nutrients from foods. Niacinamide & Niacin, both compounds are identical in their vitamin function.

Human Nutrition:

In Vitamin premix, dietary food supplements, enrichment of breakfast cereals and flour, beverages & energy drinks, infant formulas, baking and confectionery.

Pharmaceuticals:

Multivitamin tablets, Niacinamide for treatment of diabetes and Niacin for high cholesterol levels.

Animal Nutrition:

Poultry, dairy, swine, cattle, pet food, veterinary drugs and aqua feed.

Cosmeceuticals:

Skin creams, hair lotions and other personal care products.

Others:

Metal brighteners and metal plating industries. Also used as starting raw material for production of patented agrochemical molecules.

Core Strengths

Backward Integration to the Basic Feedstock

The complete backward integration, (Molasses – Alcohol – Acetaldehyde – Pyridine / Beta Picoline – Niacinamide / Niacin) up to the basic feedstock, is one of the major advantages that company has over the other manufacturers of Niacinamide and Niacin. The molasses obtained from sugarcane enables Jubilant to use bio - ethanol as the primary feedstock for the manufacture of Niacinamide and Niacin.

Care For Environment

Since Jubilant uses bio-ethanol as its primary feedstock unlike other manufacturers who use petroleum based feedstock (Naphtha), it manages to save a considerable amount of Greenhouse Gas Emissions. This process even helps Jubilant's customers build a greener supply chain as they use Niacinamide and Niacin produced by the Company. Jubilant saves an estimated 4.3 and 4.1 tonne CO₂ per tonne of Niacinamide and Niacin produced respectively.

Global Reach:

Jubilant has wholly owned subsidiaries with offices in US, Europe and China.

Additionally, Jubilant has global sales and distribution networks worldwide.
