

**ALLERGY THERAPY
PRODUCTS**

Allergy Therapy Products

We are one of the leading North American allergenic immunotherapy companies with 90 years of experience, and a service provider to allergists and the medical community. We also distribute our products to other markets including Canada, Europe, Australia and New Zealand through distributors

Among the **top three suppliers** in North America

Differentiators

Products & Process – we are the sole producer and supplier of venom products for the treatment of allergies in the United States. In addition, the majority of our products are produced in a unique phenol-free format, which yield better potency and stability compared to our competitors' products which contain phenol.

Manufacturing – Our allergy therapy products are manufactured at our Spokane Facility and adhere to current Good Manufacturing Processes (cGMP) and regulations set by the U.S. Food & Drug Administration. In addition, we have generated significant brand loyalty in respect of the "HollisterStier" brand, due to the quality of our products and long-standing operating history in North America.

Regulations – The majority of the products in this market are biotechnology products with grandfather status requiring an NDA from the USFDA for any new approval for manufacturing and commercialization

Products

Our allergy therapy product range includes over 200 different allergenic extracts, six insect venom products and exclusive skin diagnostic testing devices. Our main products are our extensive line of pollens, Venomil®, which is a venom product and line of acetone-precipitated extracts, such as AP Dog and AP Cat, and its QUINTIP® & ComforTen® lines of skin testing diagnostic devices.

WARNING Important Safety Information

(See full prescribing information for complete boxed warning at www.hsallergy.com)

Intended for use only by licensed health care provider experienced in administering allergenic extracts and trained to provide immediate emergency treatment in the event of a life-threatening reaction. Observe patients for at least 30 minutes following administration. Immunotherapy may not be suitable for patients with medical conditions that reduce their ability to withstand a systemic reaction. Allergenic extracts can cause serious systemic reactions, including anaphylactic shock and in rare cases death, especially in patients who have severe or steroid-dependent asthma, cardiovascular disease, or in patients who use beta blockers. Do not inject intravenously. This product is intended for subcutaneous injection for immunotherapy and percutaneous use for diagnosis. Refer to contraindications, warnings, precautions, adverse reaction and over dosage for more detailed information.

Adverse reactions on our products can be reported by calling 800-495-7437, or by emailing adversereactions@jhs.jubl.com. You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 800-FDA-1088.
